

## **Week 12**

- 1 Please read the Chapter 10-11.
- 2 You should have an ideal about the Mass-Storage Structure.
- 3 You should know disk scheduling methods including FCFS, SSTF, SCAN, C-SAN, LOOK and C-LOOK.
- 4 You should know what the RAID is and why we use it.
- 5 You must know the file system and directory organization.

Understand the terms:

- 1 direct memory access
- 2 redundant array of independent disk
- 3 file allocation table
- 4 inode
- 5 general graph directories
- 6 indexed allocation
