Week 7

1   Please read the Chapter 6 from page 261 to page 281.

2   You should have an idea about basic concepts of scheduling.

3   You should know the scheduling criteria including CPU utilization, throughput, turnaround time, waiting time and response time.

4   You should know the First-Come, First-Served Scheduling algorithm and Shortest-Job-First Scheduling algorithm.

Understand the terms:

1   short-term scheduler

2   dispatcher

3   scheduling criteria

4   First-Come, First-Served Scheduling algorithm

5   Shortest-Job-First Scheduling algorithm
